

RealTank

Inspection and Calibration of Tank and deposit with results in real time

CT3
INGENIERÍA

Know the actual volume and geometry of their tanks and deposit

Complete solution to calibrate all types of tanks and deposit according to API-2552 and API-2555

Accuracy Certificate EIM-FLO-6

Hellenic Institute of Metrology

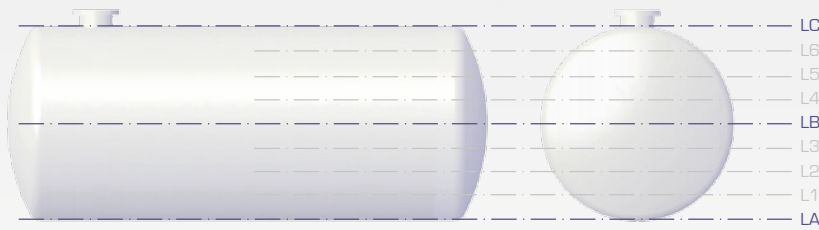

a member of

CT3 Ingeniería | Solvency and Quality

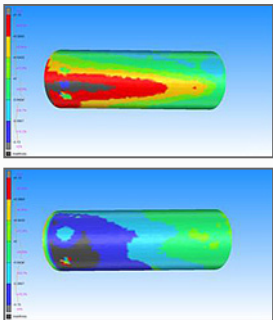

Calibration tables

Elevation (mm)	Volume (m³)
0	0,000
5	0,004
10	0,020
15	0,092
20	0,273
25	0,521
30	0,811
35	1,129
40	1,472
45	1,836

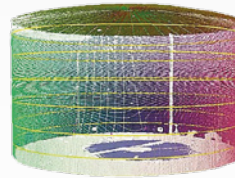

RealTank generated in real time the volume and calibration tables of the instrumentation systems

Deformations Study

RealTank generates reports deformations against theoretical geometry, allowing have full control of the situation and evolution in time of the tank

Settlements

RealTank Generate maps of settlements of tanks and deposits, providing results in real time.

Applications

Tanks and Deposits
Underground and aerial

Large Tanks and deposits

Chemist industry

Food Industry

Transport Systems

Deposits with thermal cycling and high precision applications

✓ Benefits

- Quick real time results
- Accurate and reliable
- Safety, without access to confined spaces
- Economic, Saaving time and money
- Full Data collection
